

LIFE® SoftPac

AED Companion O₂ Unit

Available in two different models, the LIFE Soft-Pac system is the preferred choice for frequent carrying as it weighs only 6 pounds and has a comfortable handle and shoulder strap. It also includes an accessible wall hook. Model LIFE-2-612 features the FDA minimum setting of 6 liters per minute for 'general' emergencies and includes the American Heart Association's recommended 100% oxygen at 12 liters per minute for 'extreme' emergencies.

This model is recommended for public buildings, workplaces and home care use, while the LIFE-2-025 model is recommended for trained EMTs, and features a variable flow rate with twelve independent flow settings for a wide range of emergencies. Both models contain a 40 minute supply of oxygen when they are set at 6 LPM, and the constant reading gauge allows monitoring of the amount of oxygen remaining in the unit.

LIFE-2-612

6 and 12 lpm (NORM and HIGH)

LIFE-2-025

0 - 25 lpm - variable flow

12 liter-flow settings - for EMT's only

LIFE-6FF

6 lpm Fixed-Flow

LIFE-2-101

Replacement Cylinder

M9, 250L

- 4 1/2" x 7 1/2" x 15"
- 5 Year Warranty
- Inhalator for a breathing victim and Resuscitator for a non-breathing victim
- Disposable/Replaceable (or refillable) cylinder, Non-Prescription, shipped full of O₂ ready-to-use
